

How to Export for Upload to Social Media:

*Note, each file is only suitable for the social media in the file name due to sizing requirements.*

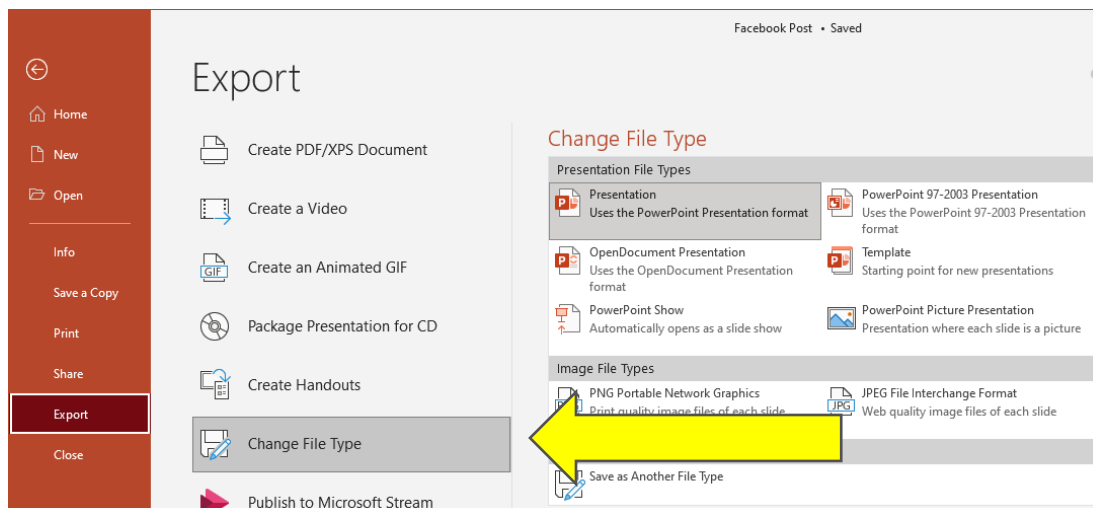

1. When ready to export, navigate to the “File” tab in the task bar

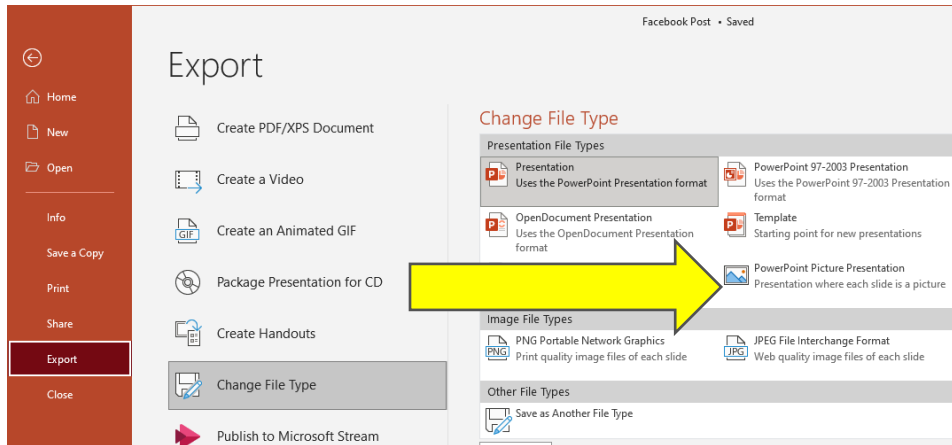

2. Open the “File” tab
3. Navigate to “Export” and click it

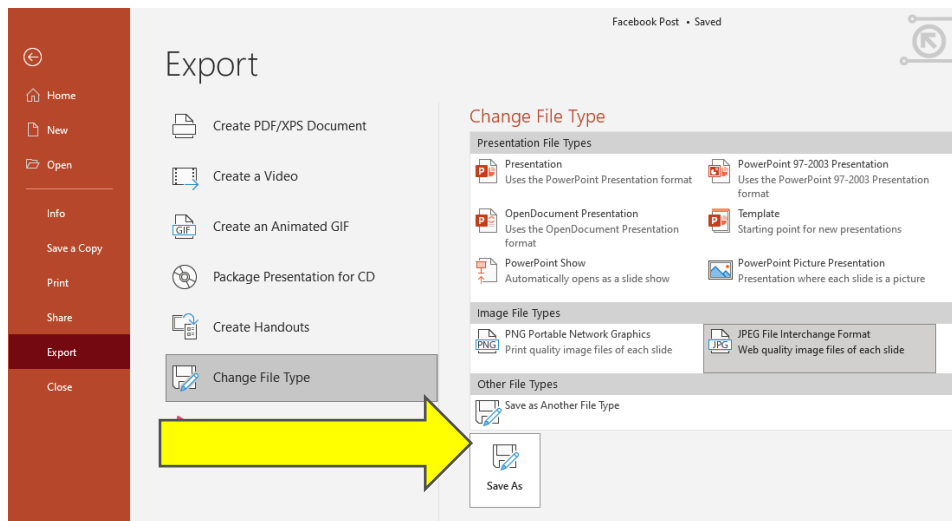

4. Choose “Change File Type” from side menu

5. Find the “JPEG File Interchange Format” button and click it

6. Click “Save As”

7. Rename file and save to computer
